

waterloop®: a unique system for a variety of applications

The waterloop toilet system can be installed in many different situations, from normal domestic buildings to mobile applications.

The low water consumption makes the system highly suitable for use in remote houses, boats and green projects.

The simple installation, with no need for flushing tank, makes the toilet system attractive for use in more applications such as restaurants, shops, offices and public facilities.

Waterloop System. Beautiful Sanitary Technology

A beautiful bathroom in any location.

Comfortable, silent and with a minimum use of clean water

waterloop@waterloop.eu

Direct connection to water line, no tank and flush mechanism required.

Only 1.8 liter for full flush, instead of 6/9 liters.

Very silent operation.

The flushing vortex perfectly cleans the bowl, no brush required.

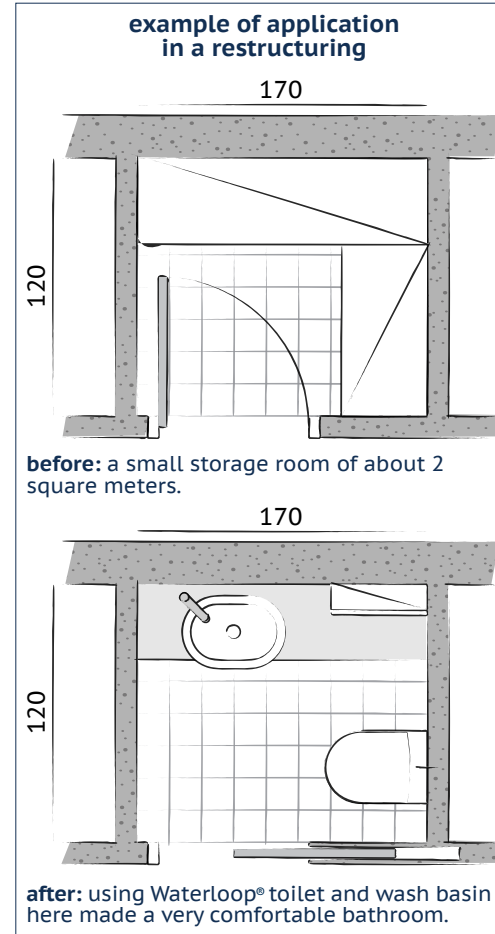

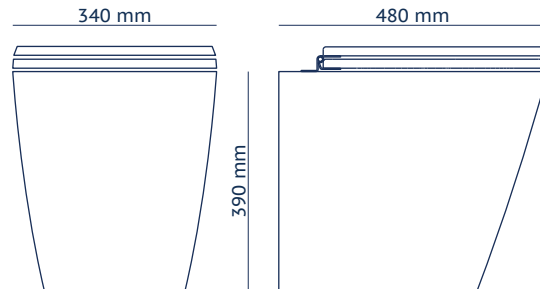

The light vacuum system extracts air and contaminations for more hygiene.

40 or 50 mm discharge pipe for easy and flexible installation instead of 110.

Product benefits

- Very low water consumption (only 1.8 liters)
- Made of Vitreous China.
- Stylish contemporary design.
- Easy to clean surfaces
- Deep basin and siphon patented
- Self-cleaning toilet, no clogging.
- Easy to install, (only water connections).
- Macerator power supply 24V DC or 230V AC

With the new waterloop® toilet system you are free to choose where you want to create your bathroom. In any room of the building, on any level and even in a cellar. The small 40 or 50 mm discharge pipe and the remote installed vacuum macerator offers you this flexibility. If your space is limited, fortunately you do not have to create space for a flushing tank behind the toilet. Place the toilet against the wall and connect it to the water pressure line.

To complete your stylish bathroom waterloop also offers a line of quality sanitary ware including a bidet and a wash basin. These products are made in high quality vitreous China and are easy to clean.

Waterloop makes it possible to create a design bathroom in any location and even save on clean water. Without any compromises to comfort, quality and hygiene.
